

Working as a civil engineer enables me to see the positive impact H2M has on local communities. Whether it is providing clean water, protecting our environment, or improving our sidewalks, roadways, and infrastructure, we are able to better the communities we serve.

- Sean Peters, Staff Engineer II

H2M is a multi-disciplined professional consulting and design firm, proud of our long history of client service and our consistent ability to meet tough architectural, engineering and environmental challenges head-on. Since 1933, H2M has helped design and build many of our communities: from treatment facilities to firehouses, from land surveying to road reconstruction, from site assessment to remediation.

Since our early roots, our focus has remained steadfast: to provide quality service with sound judgment and to serve as an honest professional resource to our clients. With a dedicated, responsive staff and multiple service offerings under one roof, we blend “can-do” with “can-be,” developing real, workable solutions with a dose of innovation. Our diverse in-house expertise reduces the need for sub-consultants and ensures that our architects and engineers develop a comprehensive understanding of every project.

Our services include:

- architecture
- civil/site engineering
- construction inspection/administration
- corrosion consulting/coatings inspection
- electrical engineering
- environmental engineering
- environmental planning/permitting
- forensic cause & origin
- GIS mapping
- hydrogeological services
- indoor air quality
- landscape architecture
- mechanical/HVAC engineering
- plumbing/sanitary engineering
- planning
- solid waste management
- storage tank management
- structural engineering
- survey
- sustainable design
- wastewater engineering
- water supply engineering
